The Lordosit®

A preventive and therapeutic back support for people who often sit for longer periods. In the car, in the office, wherever you are, the Lordosit® gives you an excellent support in your back.

To sit often hurts...

Most people spend a major part of their lives sitting. With the back complaints sitting for longer periods become painful. We all have experienced it during the long car drives.

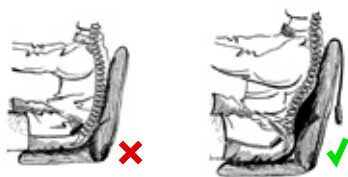

What is the cause?

In most cases the recognizable cause is insufficient support in the lower back. The Lordosit® solves this problem. It's made of flexible polyeter material, that is why it improves the shock resistance of the spine a lot better, then the 'air' cushions.

A simple solution

The Lordosit® will give an ideal support of the spine. This back support will prevent a convex position of the spine.

You can use the Lordosit in any chair and is easy adjustable.
